SOUMYADEEP NANDI

Software Engineer | React.js | TypeScript | Next.js | Node.js

Gurugram, Haryana, India (open to remote) | +91 9749648272 | soumyanandi100@gmail.com

linkedin.com/in/soumyadeep-nandi | github.com/soumya100 | soumyadeep-nandi-portfolio.vercel.app

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building user interfaces and web applications with React.js, TypeScript, Next.js and Node.js. Owns features from specification to production, integrates REST APIs with backend teams, and writes tested, maintainable code with Jest and Playwright. Experienced in enterprise dashboards, Micro Frontend architecture, state management (Redux Toolkit, TanStack Query) and performance optimization. Uses Claude Code and GitHub Copilot to write technical specifications and speed up implementation.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux Toolkit, TanStack Query, Material UI, Tailwind CSS, Formik, Yup, Responsive Design

Backend & APIs: Node.js, Express.js, REST APIs, API Integration, SQL

Architecture: Micro Frontends, Module Federation, Component Architecture, Custom Hooks, Design Patterns

Real-Time: WebSockets, Yjs, CRDT, Live Data Synchronization

Performance: Code Splitting, Lazy Loading, Memoization, Client-Side Caching, Bundle Optimization

Testing & Quality: Jest, Playwright, Unit Testing, End-to-End Testing, Code Reviews

Cloud & Tools: GCP, Docker, Vercel, Git, GitHub, Webpack, Vite

AI-Assisted Development: Claude Code, GitHub Copilot, Technical Specifications, Prompt Engineering

PROFESSIONAL EXPERIENCE

Sr. Associate Software Engineer | TechBridge Consultancy Services, Gurugram, India **Jun 2024 - Present**

- Developed React and TypeScript user interfaces for enterprise applications using reusable components and custom hooks, improving maintainability and development speed.
- Designed Micro Frontend architecture using React and Module Federation.
- Built enterprise monitoring dashboards with real-time data visualization and operational reporting, handling datasets of approximately 10,000-50,000 records.
- Implemented Redux Toolkit and TanStack Query for state management, caching and server-state synchronization, reducing redundant network requests.
- Improved dashboard responsiveness using code splitting, lazy loading, memoization and rendering optimizations.
- Used Claude Code and GitHub Copilot to plan features, write technical specifications and generate automated tests with Jest and Playwright.
- Worked with backend, QA and product teams in Agile sprints, architecture discussions and code reviews.

Frontend Developer | Underscore Technology Private Limited, Kolkata, India **Jun 2023 - Jan 2024**

- Developed responsive React.js and Next.js web applications and client portals for desktop and mobile.
- Built reusable Material UI component libraries to keep design consistent across projects.
- Integrated REST APIs with loading, skeleton, error and retry handling; refactored code to improve maintainability.

Frontend Development Intern | b4b Technologies Private Limited, Kolkata, India **Apr 2022 - Jun 2022**

- Implemented WebSocket-based notifications and live dashboard status updates.
- Developed client-side caching to reduce unnecessary API requests.

PROJECTS

Zenvora - Privacy-Focused Metasearch Engine (Full-Stack) | github.com/soumya100/Zenvora | zenvora-beta.vercel.app
Technologies: React, TypeScript, Vite, Tailwind CSS, Node.js, Express, Docker, Caddy

- Built a zero-tracking metasearch engine with a React and TypeScript frontend and a Node.js/Express API that proxies queries through SearXNG to Google, Brave, DuckDuckGo, Wikipedia and GitHub.
- Designed tabbed search (Web, News, Images, Videos, Science, IT), a Wikipedia knowledge panel, dark/light themes and keyboard-first navigation; deployed on Vercel and containerized with Docker Compose and Caddy.

Real-Time Collaboration System
Technologies: React, TypeScript, Yjs, WebSockets, CRDT

- Built a collaborative editing workspace using Yjs and WebSockets with conflict-free synchronization and optimistic UI updates for multi-user editing.

EDUCATION

Bachelor of Technology (B.Tech), Computer Engineering | Brainware University **2019 - 2023**
CGPA: 9.44/10. Coursework: Data Structures and Algorithms, Software Engineering, Database Management Systems, Web Development.

ADDITIONAL INFORMATION

Hands-on experience deploying applications on Google Cloud Platform (GCP). Interests: Frontend Architecture, Performance Engineering, Micro Frontends, Real-Time Collaboration Systems.
